

 **MITSUBISHI
ELECTRIC**
Changes for the Better
AIR CONDITIONERS

COOLS EVERY CORNER

AJ-Z
Series

**1954**

Room Air Conditioners production started

1960

Introduced premium range of Air Conditioners: Window type as "**Karuizawa**" & Floor Mounted type as "**Kamikochi**"

1961

First in the industry to begin sales of **heat pump Air Conditioners** for residential use

1967

Exclusive premium range "**Kirigamine**" introduced for wall mounted type Air Conditioner

1968

First in the world to begin sales of separate wall Air Conditioners with **built-in "Line-Flow Fan"**

1971

Introduced **Japan's quietest**, light all-plastic **Air Conditioner**

1975

Introduced **slim Air Conditioner** with depth of 17cm.

1978

Introduced industry's first mounted "**Green Sign**" **temperature indicator**

1984

Introduced inverter-driven Air Conditioner with **wireless remote control** and **automatic ventilation flaps**

1986

Introduced body temperature control via "**automatic temperature control feature**"

1988

Introduced "**Twin-Fan Air Conditioner**" as the pioneer of comfortable air flow

1994

Introduced "**Panorama Eye**" (built-in sensor to detect location of people)

1995

Introduced "**Wide & Long Energy-saving**" **Kirigamine** with 120° wide air flow and industry top level energy saving

2000

Introduced "**I Feel Kirigamine**" equipped with the "**I Feel**" **multi-sensor system**, including the industry's first heat sensor To measure the temperature felt by Room occupants

2005

Introduced the "**Kirigamine i-see Sensor (Move Eye)**" for wide-area living spaces

2007

Introduced the 8 Series equipped with the **human-sensing i-see sensor (Move Eye)** and **automatic cleaning** functions. Released the "**Zubdan Kirigamine**" specified for the use in cold areas

2010

MITSUBISHI ELECTRIC INDIA operations started

2012

Introduced the "**Hybrid Kirigamine**" Which saves energy by automatically Switching between '**cooling and Heating**' and '**ventilation**'.

2016

World's first '**Personal Twin Flow**' with different temperatures in the room

2017

Introduced with **Dual Barrier Coating** feature first time in India

2019

Introduced the **Tropical Inverter Series**

2021

New **Kirigamine** Models introduced in India

2026

Launching an Air Conditioner and Compressor Factory in India under the **Make in India** initiative.

OUR DESIGN

Mitsubishi Electric, a global leader in air conditioning, understands its customer requirements better than anyone else. At Mitsubishi Electric, we invest great care in designing our product features. Instant relief from scorching heat is one such desire met successfully through the Turbo Cool feature in our air conditioners provided just at the click of a button.

Metal Protective Cover

Metals Box and sheet metal ensures the prevention of fire accident in case of short circuit in IDU & ODU

Blue Fin Coating

A special coating is applied to the IDU & ODU heat exchanger to increase corrosion toughness

Protected PCBs

Special Coating prevents any damages from humidity & insects

New LCD Remote Controller

New stylish and compact remote controller features easy-read big display and simple button position with fundamental functions

AJ-Z Series

PM 2.5 Filter

Effectively catches floating PM2.5 particles to maintain clean air in the room. Electrostatic material removes PM2.5 from the air and absorbs it when passing through the filter.

Eco Cool

With the Eco Cool operation the set temperature can be 2°C above the conventional temperature without loss of comfort and with a 20% increase in energy efficiency.

Long Air Flow

The high-power motor pushes air out further, providing an extended airflow that can reach the far end of long living rooms or reach the kitchen-in-open concept living areas and studios.

Grooved Piping

Hi-performance grooved piping is used in heat exchanges to increase the heat exchange area.

LCD Remote Control

You'll be able to customize your environment at a touch of a button. The generous LCD display lets you check temperature and other operating conditions at a glance.

DC Fan Motor

A highly efficient DC motor drives the fan of the indoor unit. Efficiency is much higher than an equivalent AC motor.

4-Way Swing

Bringing extra comfort to your life, left-right and up-down vanes can be controlled by remote controller. You can easily adjust direction of airflow to reach any corner of the room.

AUTO VANE CONTROL

Up & Down/Left & Right

Auto vanes can be moved left & right/
up & down using the swing buttons
in the remote controller.

Horizontal Airflow / Auto Vane Control

Four-way swing with auto vane control ensures balanced,
comfortable, and efficient cooling throughout the space.

**Automatic Vertical
& Horizontal Movement
4-Way Airflow**

**Mode-Based Vane
Movement**
Adapted to Cooling,
Heating & Fan Modes

Auto Vane
Control
Button

- » Even cooling in every corner of the room
- » Automatic adjustment of vane angles (no manual setting needed)
- » Improved comfort by avoiding direct airflow on one spot
- » Better efficiency through optimized air circulation

MICRO PARTICLE CATCHING FILTER PM2.5

The advanced high-efficiency filter effectively traps floating PM2.5 particles, reducing airborne pollutants and maintaining clean, fresh air throughout the room for everyday comfort.

Electrostatic material removes PM 2.5 from the air and absorbs it when passing through the filter.

HYDROPHILIC BLUE COATING FOR INDOOR UNITS

Hydrophilic Blue Coating in air conditioners is a special coating applied to the evaporator coils of the unit. It allows water to spread easily over the surface, instead of beading up and improves heat exchange efficiency, enhancing the overall performance of the air conditioner. The coating also provides some protection against corrosion caused by moisture, pollutants, and salt, particularly in humid or coastal areas.

Here's why **Hydrophilic Blue Coating** is used in air conditioners:

IMPROVED EFFICIENCY

CORROSION RESISTANCE

BETTER AIRFLOW

EASIER MAINTENANCE

Hydrophilic Blue Coating for Indoor Units

Without Coating

After Coating

NEW LCD REMOTE CONTROLLER

New stylish and compact remote controller features easy-read big display and simple button position with fundamental functions.

LCD Backlight

With LCD Backlight Display, the settings can be easily checked in the dark.

Ergonomic Design

The ergonomic layout and intuitive buttons make operation simple and accessible for users of all ages.

A Remote Controller That Fits You

Its compact design creates the perfect fit for your hand.

What is MITSUBISHI ELECTRIC Quality?
MEQ represents our dedication to excellence in developing and manufacturing exceptional, eco-friendly home appliances, amazing industrial products, reliable public infrastructure systems and inspiring space technologies, which are truly out of this world. And there's so much more. When you see the MEQ logo, you know something good is being created.

DESIGN

To ease our customer's mind, we invest great care while designing. So that they may use our products with the reassurance that comes through high-quality parts manufacturing and impeccable assembly.

Ensure its reliable operation and preventing fire accident in case of short circuit.

Special coating prevents any damages from humidity and insects.

A special coating is applied to the heat exchanger to increase corrosion toughness.

Anti-rust painting and galvanized steel protect cabinet even under harsh environment.

DEVELOPMENT & PRODUCTION

MITSUBISHI ELECTRIC makes full use of its advanced production technology to efficiently produce top-quality products. All our products are inspected by experienced professionals. Taking into account the various harsh environments around the world, at MITSUBISHI ELECTRIC we have established uniquely strict quality control standards and various quality evaluation tests for our products.
